

IEEE CASE 2026

The 22nd International Conference on
Automation Science and Engineering

WORKSHOP #4 @ IEEE CASE 2026

SAFETY-CRITICAL ROBOTICS:

From design principles to safe autonomy
in industrial and human-centered environments

 **Date**

August 17, 2026

 **Location**

Shenyang, China

 **Format**

Keynote talks, panel,
poster spotlights

KEYNOTE SPEAKERS

Heye Huang

Korea Advanced
Institute of Science
& Technology
(KAIST)

Liang Hu

Harbin Institute of
Technology,
Shenzhen

Wei Pan

Newcastle
University

Yanlong Huang

University
of Leeds

Matteo Saveriano

University
of Trento

Zhao Guo

Wuhan
University

Ning Li

Shenyang Institute
of Automation,
Chinese Academy
of Sciences

SCIENTIFIC SCOPE

- Robot design with intrinsic compliance
- Dynamic modeling for safe interaction
- Motion planning and navigation under safety constraints
- Reactive and barrier-based safety control
- Human-robot collaboration
- Safety-aware learning
- Robustness under uncertainty
- Fail-safe and recovery behaviors

ORGANIZERS

Jiatao Ding

Postdoctoral Researcher
University of Trento

Songqun Gao

Postdoctoral Researcher
University of Trento

Maolin Lei

Postdoctoral Researcher
University of Tokyo

Shiliang Shao

Associate Professor
Shenyang Institute of
Automation, CAS

Xiangyu Shao

Associate Professor
Harbin Institute of
Technology

Claudio Semini

Senior Research Scientist
Istituto Italiano di
Tecnologia

Ioannis Havoutis

Associate Professor
University of Oxford

Wei Pan

Full Professor
Newcastle University

CALL FOR POSTERS

We invite poster submissions on (but not limited to):

- Original research
- Work in progress
- Deployment experiences
- Early-stage ideas

POSTER REQUIREMENTS

- A0 format
- PDF
- File name: **Poster + Name + affiliation.pdf**

IMPORTANT DATES

- Poster Submission: **July 27, 2026, 23:59 AoE**
- Notification: **August 10, 2026**

SUBMISSION

Please submit your poster via email:

workshopsbmit@outlook.com
